## INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

Entry and consideration of the enclosed Form 1449A - Information Disclosure Statement By Applicant is respectfully requested in accordance with 37 C.F.R. §1.97, being filed together with an RCE in accordance with 37 C.F.R. §1.114.

A copy of each document or other information listed on the enclosed Information Disclosure Statement will be provided at a later date in accordance with MPEP 609.04(b)IV.

This submission does not represent that a search has been made or that information cited is, or is considered to be, material to patentability as defined in 37 C.F.R. §1.56(b), or that information cited is, or is considered to be "prior art" within the meaning of 35 U.S.C. §§ 102 and 103, or that information cited has been thoroughly reviewed or that any relevance of any portion of a reference is intended. Applicant

reserves the right to establish that any information cited is not "prior art," and that the date of publication indicated for a cited item is in fact different than that which is indicated.

Pursuant to the provisions of M.P.E.P. 609, it is requested that the Examiner return a copy of the enclosed Information Disclosure Statement, marked as being considered and initialed by the Examiner, to the undersigned with the next official communication.

No fee is believed to be due in connection with the filing of the enclosed statement. However, the United States Patent and Trademark Office is hereby authorized to charge any fees that may be required for entry of this paper to Deposit Account No. 501380.

Respectfully submitted,

Daniel J. Swirsky Representative for Applicant Registration No. 45,148

IN APPARATUS AND A METHOD FOR CONTROLLING PERIPHERAL DEVICE IN A VEHICLE

#### ASSTRACT:

This invention relates to an apparatus and a method for controlling peripheral device in a vehicle by recognizing a driver's voice command. According to this invention, a drive can manipulate peripheral device in a vehicle by his voice command, and thus he need not manually manipulate the internal system of a vehicle.

An apparatus for controlling paripheral device in a vehicle comprises: a voice recognition section for receiving a driver's voice signal and determining whether the received voice signal corresponds a command for controlling the peripheral device which have been stored in a memory; a controlling section for receiving the output signal from the voice recognition section and determining a target device to be controlled based on the signal; and a MICOM for controlling the target device based on the output signal from the controlling section.
